

Exercise 1

Looking at data distributions

In this exercise we use the growth season data.

1. Download the file growth.sav and read the file in SPSS.
2. Create a stem-and-leaf plot.
3. Draw a time plot
4. Calculate the mean, median and standard deviation.
5. Draw a boxplot.
6. Draw a histogram with normal curve.
7. Draw a normal quantile plot.
